

Claims: I claim a replacement or aftermarket leak-proof brake bleeder comprising:

- a. a replacement valve body that seals into the original equipment manufacturer's brake cylinder and contains a valve seat and, brake fluid passages,
- b. a replacement bleeder valve with a valve seat for sealing with said valve seat above and, that has brake fluid passage holes or slots as needed and, is secured in said replacement valve body above,
- c. an O-ring secured between said replacement valve body above and said replacement bleeder valve above, thereby preventing the leakage of brake fluid or air.
